**Amendments to the Claims**

This listing of claims will replace all prior versions and listings of claims in the application.

**List of Claims:**

1 – 57. (Cancelled)

58. (New) An apparatus for placing packaging material in a predetermined position relative to an array of articles conveyed by an article conveyor in a first direction of travel at a first velocity, the packaging material having erectable cells for receiving the articles, the apparatus comprising:

an erection device having means for receiving the packaging material in a collapsed condition and erecting the cells; and

feed means having means for feeding the erected packaging material from a direction substantially perpendicular to the first direction of travel of the article conveyor;

wherein said feed means is disposed at an output end of said erection device and said feed means has means for accelerating the erected packaging material to a second velocity relative to the first velocity of the article conveyor such that the erected packaging material is placed in the pre-determined position while forward motion of the array of articles is maintained.

U.S. Application No. 10/613,689

Filed: July 3, 2003

59. (New) The apparatus of claim 58, further comprising a control system for effecting synchronization of said erection device, said feed means and the article conveyor.
